

TECHNICAL DATA SHEET

LANDBLOCK[®]

What is LANDBLOCK[®]?

LANDBLOCK[®] is a support with water ballast that is perfect for installing solar systems on any flat surface (rooftop, ground, etc.).

Advantages

- ✓ **Efficient:** Lowers costs and reduces installation time
- ✓ **Simple:** Easy to install, NO foundation work, NO metal structures and NO heavy machinery
- ✓ **Logistics:** Lightweight and stackable
Lowers transport and storage costs

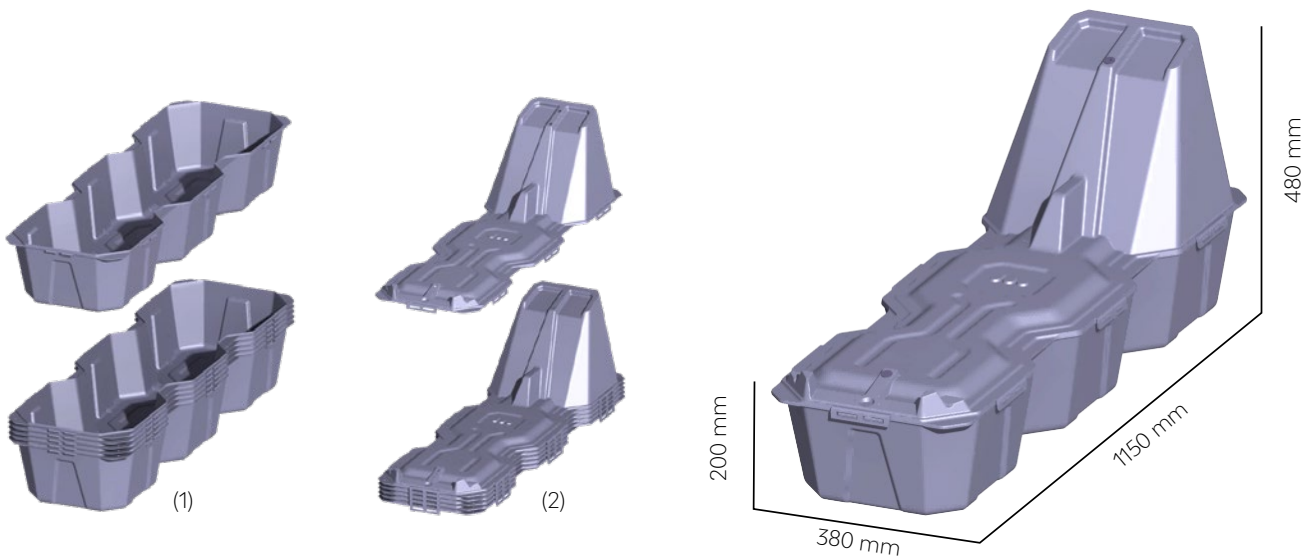

SPECIFICATIONS

General

System	Support for photovoltaic modules
Product guarantee	10 years
Area of use	All kinds of flat surfaces
Dimensions	380 x 1150 x 480 mm
Surface slope	Maximum 0-5°

System properties

Wind speed	Up to 162 km/h
Material	HDPE, aluminium
Module tilt	15°
Temperature range	-30° C to 100° C
Approx. weight of empty support	3 kg/support (base + cover)
Ballast capacity	Up to 100 kg (water, sand, gravel...)

Stackable Includes a base (1) and cover (2).

LANDBLOCK® Support.

Expandable. Use as many LANDBLOCK® modules as you need to set up your solar system.
